Good afternoon,

My name is Daniel Ward from Richmond, VA and as a future, first-time entrepreneur, I'm eagerly interested in your expertise and services along with your representation and connections to banks and other financial institutions, investors (Private Equity) and etc... in order to help me secure source(s) of funding for my future small television stations business venture from the ground up that I'm proposing during 2020 in my Richmond-Petersburg broadcast TV market #55.

As soon-to-be sole owner of these television broadcast stations in the spirit of competition through this grassroots effort, I will provide my local area viewers a range of health and wellness lifestyle-gearred programming, appear to and offer local small businesses and companies cost-effective methods and tactics and hire station personnel (under numerous job positions). Thank you!

Sincerely,
Daniel Ward

Just to add, the funds acquired will be used for the following items:

- Nine television station FCC construction permits and broadcast licenses. Price around \$15,000.00.

- buying in full a 76-acre lot (\$6,500,000.00) and construct a 40,000 sq.ft flex building (price to be determined) for studio and production space to operate the station at this location in Goochland, Virginia.

- building insurance.

- purchasing cost-conscious television programming.

- purchasing multiple station office furniture and several major equipment (i.e. satellite antenna dishes, multiple content delivery platform server boxes, multiple computer servers, multiple editing equipment and software, phone and internet services, commercial generator, multiple Ultra-HDTV/SDTV broadcast automation playback systems and a guyed mast broadcast tower just to name a few).

- costs in acquiring both local and/or state business LLC licenses.

- hiring legal representation focusing on commercial television broadcasting for the stations.

- to cover first-year county property tax(es) ...and so much more.
